

Change Proposal – F40/01 (Page 1 of 3)	CP No: 710 <i>(mandatory by BSCCo)</i>
Title <i>(mandatory by originator)</i> Changes to the 'Communication Requirements Document' to include the procedure for updating PCSec keys and FTP account passwords.	
Description of Change <i>(mandatory by originator)</i> The current procedure for changing PCSec keys and FTP account passwords was specified in ELEXON Circular No. EL00137, issued on 17 July 2001. It has been suggested that this procedure be formalised and included in the 'Communication Requirements Document' which is a Code Subsidiary Document.	
Proposed Solution(s) <i>(mandatory by originator)</i> The procedure for changing PCSec keys and FTP account passwords should be included in the 'Communication Requirements Document.'	
Justification for Change <i>(mandatory by originator)</i> It is desirable that the 'Communication Requirements Document' contain a coherent and complete explanation of the security arrangements pertaining to the communications networks used in connection with the BSC. The 'Communication Requirements Document' is a Code Subsidiary Document, subject to formal control. Participants regard communications security as an important issue, which ought to be formalised and placed under a recognised change process.
