Detailed Impact Assessment Responses CP1397	
Organisation	Responses/ Comments
British Gas	Agree with the implementation approach?? – Yes Any other comments? None
EDF Energy	Agree with the implementation approach? – Yes Any other comments? We don't anticipate our processes being adversely affected by the proposed change.
Electricity North West Limited	Agree with the implementation approach?– Neutral Any other comments? None
Northern Powergrid	Agree with the implementation approach?– Neutral Any other comments? None
npower	How is your organisation impacted? – The change will provide extra clarity, remove confusion, and provide BMRS users with greater confidence when comparing the indicative triad data against the definitive triad data published by National Grid. As a Supplier, we expect to see a reduction in costs associated with resolving customer queries relating to Triad Demand data as a result of the current data not aligning closely with the definitive data. What are the associated costs on your organisation to implement the change? – There is no cost to implement the change internally. However, as a BSC Party we will pick up a share of the £65k of Central Costs identified in the Assessment Consultation. Agree with the implementation approach? - Yes Any other comments? None

ScottishPower	Agree with the implementation approach?? – Yes Any other comments? None
TMA Data Management Ltd	Agree with the implementation approach? – Neutral Any other comments? Do the benefits to the BMRS website users justify the £65200 ELEXON cost? As there is no information provided in the IA document on what it costs (if anything) the BMRS website users, it is difficult to assess the necessity for change.
Western Power Distribution	Agree with the implementation approach? – No comment Any other comments? None
