

Change Proposal – BSCP40/02	CP No: CP1402 Version No: v0.1 (mandatory by BSCCo)
Title (mandatory by originator) Aligning the Deliverables in the Profile Administration Service Description with the Data Analyst Contract.	
Description of Problem/Issue (mandatory by originator) Section 5 of the Profile Administration (PrA) Service Description describes the process for each Settlement Year, by which the Profile Administrator delivers various Technical Product Deliverables on the Delivery Date(s) as defined in the Data Analyst Plan. However, this needs updating to reflect all the reporting deliverables from the ELEXON Contracted Analyst¹ and match those defined in the aforementioned Contract, as the Service Description does not currently cover all of the deliverables currently produced.	
Proposed Solution (mandatory by originator) Amendments are required to section 5 of the PrA Service Description to align the list of Document Deliverables with those produced under the Data Analyst Contract. Please see the draft redlining in Attachment A for the proposed amendments.	
Justification for Change (mandatory by originator) The updates to the PrA Service Description are required for the consistency between it and the Data Analyst Contract. This will ensure that the Service Description fully documents all the deliverables produced under the contract.	
To which section of the Code does the CP relate, and does the CP facilitate the current provisions of the Code? (mandatory by originator) BSC Section S ‘Supplier Volume Allocation’ – this CP will better facilitate the provisions for the Profile Administrator in Section S4.2.	
Estimated Implementation Costs (mandatory by BSCCo) One ELEXON man day of effort to implement the redlined changes. One ELEXON man day equates to £240.	
Configurable Items Affected by Proposed Solution(s) (mandatory by originator) PrA SD ‘Service Description for Profile Administration’ – the proposed changes can be found in Attachment A.
