Detailed Impact Assessment Responses CP1407 v2.0	
Organisation	Responses/Comments
British Gas	<p><b>Agree with the implementation approach?</b> – Yes</p> <p><b>Any other comments?</b> As the purpose of the change is to simplify the process we don't see why you have left the use of the templates as optional.</p>
EDF Energy	<p><b>Agree with the implementation approach?</b> – Neutral because has no impact upon us.</p> <p><b>Any other comments?</b> No comments.</p>
Electricity North West	<p><b>How is your organisation impacted?</b> – We will need to complete the new CSAD each year and take part in the Audit each year.</p> <p><b>What are the associated costs on your organisation to implement the change?</b> – None identified.</p> <p><b>Agree with the implementation approach?</b> – Yes</p> <p><b>Any other comments?</b> We are pleased that the automatic calculations had been removed, so would be happy to populate with our losses data – even though Appendix 9 is now an optional item.</p>
E.ON	<p><b>Agree with the implementation approach?</b> – Neutral</p> <p><b>Any other comments?</b> No comments.</p>
Northern Powergrid	<p><b>How is your organisation impacted?</b> We take part in the Audit each year.</p> <p><b>What are the associated costs on your organisation to implement the change?</b> No comment.</p> <p><b>Agree with the implementation approach?</b> – Yes</p>

Organisation	Responses/Comments
	<p><b>Any other comments?</b> We are comfortable with the list in the revised table for appendix 9.</p>
RWE Npower	<p><b>Agree with the implementation approach?</b> – Neutral</p> <p><b>Any other comments?</b> No comments.</p>
ScottishPower	<p><b>How is your organisation impacted?</b> – Only to the extent that when completing the templates there may be a resource implication.</p> <p><b>What are the associated costs on your organisation to implement the change?</b> – No comment.</p> <p><b>Agree with the implementation approach?</b> – Yes</p> <p><b>Any other comments?</b> Agree with change as it makes sense to apply consistency across the Industry. Have ELEXON thought about whether a pilot of using the new templates would be appropriate, prior to their formal introduction. In addition we believe that some customers may be quite sensitive to the use and sharing of their site-specific data, and we need to be assured that this data would be appropriately protected.</p>
SSEPD	<p><b>Agree with the implementation approach?</b> - Yes</p> <p><b>Any other comments?</b> No comments.</p>
TMA Data Management Ltd	<p><b>Agree with the implementation approach?</b> - Yes</p> <p><b>Any other comments?</b> No comments.</p>
UK Power Networks (IDNO) Ltd	<p><b>How is your organisation impacted?</b> – There will be a need to make some process changes.</p>

Detailed Impact Assessment Responses CP1407 v2.0	
Organisation	Responses/Comments
	<p><b>What are the associated costs on your organisation to implement the change?</b> – Estimated: less than 10 days effort to implement process changes.</p> <p><b>Agree with the implementation approach?</b> – Yes. We agree on the implementation while this allows us to use our own template.</p> <p><b>Any other comments?</b> We are supportive of this CP while it provides the scope for us to use our own template. We are happy to supply information as suggested in the 11 listed requirements.</p>
Western Power Distribution	<p><b>How is your organisation impacted?</b> – The preparation of the CSAD will be easier to prepare and check with less potential for errors.</p> <p><b>What are the associated costs on your organisation to implement the change?</b> – None.</p> <p><b>Agree with the implementation approach?</b> - Yes.</p> <p><b>Any other comments?</b> – Agree with change because moving Appendix 5 from the CSAD Word document will make our job more straightforward and the use of a standard template, Appendix 9, for the audited sites will have a minimal impact on us.</p>
