

## **BSCP520 Footnotes Version 22.0 – 7 November 2013**

### **Amended by CP1398 for 26 February 2015 Release**

1. CP1104 was approved by correspondence by SVG (SVG/50/018) for inclusion in version 6.0 of this document, effective on the BETTA Effective Date, but was omitted due to a clerical error.
2. This process shall be followed where a new additional inventory is provided by the Customer.
3. The EM Output file can only be used if a secure method of data transfer has been agreed between the MA and the HHDC,
4. D0132s received that relate to partial disconnection of an MSID should be rejected and referred back to the Supplier. Any such changes should instead be initiated by the provision of a revised inventory to the UMSO.
5. Recalculation of metering data will be required from time to time as more accurate data becomes available such as revised Summary Inventories, CMS Control Files, PECU Array data, CMS Event logs (limited to 28 days) and correction of standing data errors.
6. Backdated D0052s supersede previous data held by the NHHDC after the Effective From Settlement Date {EACDC}. Where any existing data is to be maintained, this must therefore be reaffirmed by issuing subsequent D0052s in the order by which they should be processed.
7. The obligations on the MA defined above only apply where a MA has requested the specific data flows detailed above. Inaccuracies in the MDD items that are UMS specific such as Charge Codes and Switch Regimes shall be notified by the MA to the MDDM.
8. Where a D0052 Affirmation of Metering System Settlement Details, electronic or otherwise, is received from UMSO or Supplier for an Unmetered Supply, this value must be sent to the NHHDA on a D0019 Metering System EAC/AA Data for use in Settlement. The D0052 Affirmation of Metering System Settlement Details received from UMSO should be used in preference where available.
9. Although Charge Codes are published via MDD, “Applicant” in this case does not relate to MDD authorised signatories.
10. Failures related to PECU arrays are covered in [\[Housekeeping\]4.56.42.21](#).
