### About This Document

This document is the CP1425 Final CP Report which ELEXON has published following the final decision from the BSC Panel to approve CP1425.

There are two parts to this document:

- This is the main document. It provides details of the solution, impacts, costs, and proposed implementation approach. It also summarises the BSC Panel's views on the proposed changes along with the final decision on whether to approve this change.
- Attachment A contains the approved redlined changes to deliver the CP1425 solution.

CP1425  
Final CP Report

# 1 Why Change?

## Background

As part of the Electricity Market Reform (EMR) program the Government introduced two key components to these reforms that impact the BSC. These are:

- Contracts for Difference (CFD), which are designed to act as an incentive for investment in new low-carbon electricity generation; and
- the Capacity Market (CM), designed to ensure sufficient and reliable capacity when there is not enough electricity on the Transmission System.

These mechanisms are designed to deliver greener energy and reliable supplies, at the lowest possible cost.

## What is the issue?

Consequential changes to the Balancing and Settlement Code (BSC) and its Code Subsidiary Documents (CSDs) to support the EMR arrangements were directed by the Secretary of State on 1 August 2014 ([Other Regulatory Decision \(ORD\) 005](#)).

As part of this direction, minor changes were made to [BSC Section G 'Contingencies'](#) requiring the newly appointed CM Settlement Services Provider to be informed by the Balancing and Settlement Code Company (BSCCo) of certain Black Start events. This required corresponding changes to [BSCP201 'Black Start and Fuel Security Contingency Provisions and Claims Processes'](#). Unfortunately, these changes were not identified at the time and did not form part of the direction.

### Proposed solution

[CP1425 'Consequential changes to BSCP201 following EMR'](#) proposes to make consequential changes to BSCP201 to reflect the changes made to BSC Section G by the EMR direction.

This CP involves amending the current provisions so that where BSCCo is currently required to notify all Parties of specific events and information during a Black Start, BSCCo will also be required to notify any CM Settlement Services Provider.

### Proposer's rationale

As EMR Settlement Ltd (a wholly owned subsidiary of ELEXON Ltd) is currently appointed as the CM Settlement Services Provider, the provisions in practice simply require one part of ELEXON to notify another of certain Black Start events. Amending BSCP201 will ensure that it aligns with the BSC and will reduce any potential for confusion if, in the future, another organisation fulfils the role of either CM Services Provider or BSCCo.

Since this change is a direct result of ORD005, and has no material impact (since it aligns Code Subsidiary Documents (CSDs) with the BSC, which takes precedence) CP1425 can be treated as a Housekeeping change.

### Proposed redlining

The approved redlined changes to deliver the CP1425 solution can be found in Attachment A.

## 3 Impacts and Costs

### Central impacts and costs

#### Central impacts

CP1425 will require an update to BSCP201 to implement the proposed solution. The approved changes can be found in Attachment A. No system changes will be required for this CP.

Central Impacts	
Document Impacts	System Impacts
<ul style="list-style-type: none"><li>BSCP201</li></ul>	<ul style="list-style-type: none"><li><i>None</i></li></ul>

#### Central costs

The central implementation costs for CP1425 will be approximately £240 (one ELEXON man day) for ELEXON to implement the relevant document changes.

### BSC Party & Party Agent impacts and costs

CP1425 will not impact any BSC Parties or Party Agents as this is a consequential update to BSCP201 following the effective changes made to BSC Section G under ORD005.

CP1425 is a housekeeping change and therefore does not require a CP Consultation as there are no impacts or costs on participants to implement the changes.

BSC Party & Party Agent Impacts	
BSC Party/Party Agent	Impact
<i>None</i>	<i>N/A</i>

## 4 Implementation Approach

### Approved Implementation Date

CP1425 was approved for implementation on **26 February 2015** as part of the February 2015 BSC Systems Release, as this is the next available release.

In the interim, the inconsistency has no practical impact. This is because the BSC takes precedence over BSCPs (in accordance with [BSC Section H 'General'](#) 1.5), and the Capacity Market Settlement arrangements will not begin operations until 1 October 2016.

As CP1425 is a housekeeping CP, no CP Consultation was required to seek industry views.

## 5 Final Committee Views and Decision

### BSC Panel's final views

ELEXON presented CP1425 to the BSC Panel at its meeting on 15 January 2015 ([Panel 232/06](#)).

One Panel Member queried whether the proposed wording of 'any' CM Settlement Services Provider was appropriate and whether it should be 'all' CM Settlement Services Providers. ELEXON noted that the proposed drafting for CP1425 reflects the changes already made to BSC Section G, and that CP1425 simply seeks to align these documents.

### Final decision

The BSC Panel has:

- **APPROVED** CP1425 for implementation on **26 February 2015** as part of the February 2015 BSC Systems Release.

## Appendix 1: Glossary & References

### Acronyms

Acronyms used in this document are listed in the table below.

Glossary of Defined Terms	
Acronym	Definition
BSC	Balancing and Settlement Code ( <i>document</i> )
BSCCo	Balancing and Settlement Code Company ( <i>ELEXON</i> )
BSCP	Balancing and Settlement Code Procedure ( <i>document</i> )
CFD	Contracts for Difference
CM	Capacity Market
CP	Change Proposal
CSD	Code Subsidiary Document ( <i>document</i> )
EMR	Electricity Market Reform
ORD	Other Regulatory Direction
