About This Document

This document provides information on one new Change Proposal (CP) and outlines our proposed progression timetable for this change, including when it will be issued for CP Assessment in the next suitable Change Proposal Circular (CPC) batch.

We are presenting this paper to capture any comments or questions from Trading Dispute Committee (TDC) Members on this CP before we issue it for consultation.

There are two parts to this document:

- This is the main document. It provides a summary of the CP that has been raised.
- Attachment A contains the draft redlining changes to BSCP11.

Background

The [Trading Disputes](#) process provides a mechanism for correcting identified Settlement Errors and allows for energy that was incorrectly calculated to be re-calculated, and the corrected Trading Charges distributed accordingly. Balancing and Settlement Code Procedure (BSCP) [11 'Trading Disputes'](#) sets out the procedures that need to be followed when raising and progressing a Trading Dispute.

A 'lessons learned' exercise was conducted following consideration of Trading Dispute DA618. This exercise took into account the views of both [BSC Panel](#) Members and [TDC](#) Members. It identified ambiguities in the documentation underpinning the Trading Disputes process and recommended that BSCP11 be amended to clarify the requirements associated with raising a Trading Dispute. The Panel endorsed the findings of this work at its meeting on 11 September 2014 ([Panel 228](#)).

What is the issue?

When raising a Trading Dispute, BSCP11 Section 5.1.1 requires a Raising Party to "Identify [the] alleged Settlement Error and raise a Trading Dispute" using Form BSCP11/01 and in accordance with BSCP11 Section 1.4. However, the wording of Section 1.4 does not make it clear that the alleged Settlement Error must be identified, and this is only implied in the BSCP11/01 Trading Dispute form. These inconsistencies can impact the efficient investigation into alleged Trading Disputes and therefore need to be addressed.

Proposed solution

[CP1438](#) was raised by ELEXON on 30 March 2015. This CP seeks to remove ambiguity and clarify that all BSCP11/01 Trading Dispute Forms submitted must identify a breach of the BSC or a Code Subsidiary Document (CSD) and indicate the relevant Settlement Error, in order for the form to be accepted by ELEXON. This will be done by aligning Sections 1.4 and 5.1.1 in BSCP11 and updating the BSCP11/01 Trading Dispute form to ensure it is consistent with these sections.

Likely impacts and costs

Central impacts and costs

The central implementation cost for CP1438 will be approximately £240 (one ELEXON man day) to deliver the proposed document changes. There are no system or BSC Agent impacts.

BSC Party and Party Agent impacts

There are no implementation impacts on BSC Parties or Party Agents expected. However, participants may need to update internal documentation if it directly references any of the paragraphs being amended in BSCP11.

For the avoidance of doubt, CP1438 will not affect any Trading Disputes that are raised or ongoing prior to the implementation of the Change Proposal (should it be approved).

Proposed progression

The table below outlines the proposed progression plan for CP1438:

Progression Timetable	
Event	Date
New CP Assessment presented to TDC for information	30 Apr 15
CP Consultation	05 – 29 May 15
CP Assessment Report presented to TDC for decision	02 Jul 15
Proposed Implementation Date	05 Nov 15 (Nov 15 Release)

2 Recommendations

We invite you to:

- **NOTE** that one new CP has been raised;
- **NOTE** the proposed progression timetable for this CP; and
- **PROVIDE** any comments before we issue this CP for consultation.

Appendix 1: Glossary & References

Acronyms

Acronyms used in this document are listed in the table below.

Acronyms	
Acronym	Definition
BSCP	Balancing and Settlement Code Procedure
CSD	Code Subsidiary Document
CP	Change Proposal
CPC	Change Proposal Circular
TDC	Trading Disputes Committee
