About This Document

This document is the CP1481 Final CP Report which ELEXON has published following the final decision from the SVG and PAB to approve CP1481.

There are two parts to this document:

- This is the main document. It provides details of the solution, impacts, costs, and proposed implementation approach. It also summarises the SVG's and PAB's views on the proposed changes and the views of respondents to the CP Consultation, along with the final decision on whether to approve this change.
- Attachment A contains the approved redlined changes to deliver the CP1481 solution.

CP1481
Final CP Report

Approved Modification P339

The Panel approved [P339 'Introduction of new Consumption Component Classes for Measurement Classes E-G'](#) at its meeting on 8 December 2016 ([BSC Panel 261/06](#)). P339 will introduce new Consumption Component Classes (CCCs) and also redefines some existing CCCs. [Balancing and Settlement Code Procedure \(BSCP\) 536 'Supplier Charges'](#) has references to specific CCC IDs which required updating as a result of P339.

What is the issue?

After approval of the P339 and the corresponding redlining, an error in the redlining to BSCP536 was identified.

The approved redlined changes to BSCP536 incorrectly redefined a definition to include both Active Export and Active Import, where it previously only included Active Import. The intent of P339 was not to change the definition but simply to remove the references to specific CCC IDs. There will be no change to the calculation of Supplier Charges.

Housekeeping Change

BSCP40 defines a Housekeeping Change as "the correction of manifest errors, minor errors and inconsistencies, including typographical errors (e.g. punctuation errors, spelling mistakes, incorrect font, incorrect capitalisation) incorrect cross-referencing, and the removal of redundant text."

Proposed solution

[CP1481 'Housekeeping Change to BSCP536 following approval of P339'](#) was raised by ELEXON on 14 December 2016. CP1481 proposes to include the words 'Active Import' in the approved redlining for BSCP536 to correct a manifest error.

Proposer's rationale

This change proposes to amend this manifest error to avoid any confusion.

Proposed redlining

The proposed redlining to BSCP536 can be found in Attachment A. For clarity the approved changes under P339 are shown in red and the additional text for CP1481 is shown in blue.

3 Impacts and Costs

Central impacts and costs

Central impacts

CP1481 will require an update to BSCP536. No central system changes are required and there will be no impact on BSC Agents

Central Impacts	
Document Impacts	System Impacts
<ul style="list-style-type: none">• BSCP536	<ul style="list-style-type: none">• None

Central costs

The central implementation costs for CP1481 will be approximately £240 (one ELEXON working day) for ELEXON to implement the relevant document changes.

BSC Party & Party Agent impacts and costs

Participant impacts

CP1481 will not impact any BSC Parties or Party Agents as this is a Housekeeping Change.

As CP1481 is a Housekeeping CP it does not require a CP Consultation as there are no impacts or costs on participants to implement the change.

4 Implementation Approach

Recommended Implementation Date

CP1481 has been approved proposed for implementation on **1 April 2017** to align with the approved Implementation Date of P339.

5 Final Committee Views and Decision

SVG's final views

CP1481 was presented to the SVG at its meeting on 3 January 2017 ([SVG191/07](#)). The SVG members agreed to all the recommendations and did not have any additional comments.

PAB's final views

CP1481 was presented to the PAB at its meeting on 26 January 2017 ([PAB192A/07](#)). The PAB members agreed to all the recommendations and did not have any additional comments.

Final decision

The SVG and PAB have:

- **APPROVED** CP1481 for implementation on 1 April 2017 as part of the April 2017 BSC Release.
