

Redlined BSCP71 text for P344

P344 proposes changes to sections 1.1, 3.6, 4.3, 4.4, 4.6, 4.12 and 4.16.3 . We have redlined these changes against Version 13.0

There is no impact on any other part of this document for this change.

Amend section 1.1 as follows:

1.1 Purpose and Scope of the Procedure

The purpose of this BSCP is to enable the submission of Energy Contract Volume Notifications (ECVNs) and Metered Volume Reallocation Notifications (MVRNs) to the Energy Contract Volume Aggregation Agent (ECVAA). It describes the process for submitting notifications, and replacing previously submitted notifications.

The procedure enables participants who wish to become Energy Contract Volume Notification Agents (ECVNA) or Meter Volume Reallocation Notification Agents (MVRNA) to register as such Party Agent types with the Central Registration Agent (CRA). It then enables each Party to authorise an ECVNA or MVRNA for the purpose of providing ECVNs or MVRNs to the ECVAA.

Notification authorisation may be established on a single or dual basis: a single notification authorisation is where the same ECVNA or MVRNA is appointed by both Parties; a dual notification authorisation is where a different ECVNA or MVRNA is appointed by each Party. In addition the procedure also caters for a single Party wishing to provide to ECVAA, ECVNs related to its two Energy Accounts.

In the case of ECVNA Authorisations, Parties must also use this procedure to specify whether for a given Authorisation, notification amendments should be processed on an additional or replacement basis, or whether both amendment types should be accepted. Whether an Authorisation allows an ECVNA to submit additional, replacement or both types of ECVN is its Notification Amendment Type.¹ This procedure explains how Parties may change the status of an Authorisation's Notification Amendment Type.

The procedure describes the process by which ECVNs and MVRNs are submitted by ECVNAs and MVRNAs, and provides details of the data required in a valid notification. It also provides details of the rules for:

- Refusal or rejection of an otherwise valid notification because of Credit Default;
- Termination of ECVNA and MVRNA Authorisations; and
- Procedures to allow Contract Trading Parties to nullify all notified volumes between two accounts providing all authorisations between those accounts have already been terminated. (Note that this nullification procedure is not selective: specification occurs at the BSC Party level and is for use when it is imperative to nullify all notified volumes between a Party and Counter Party).

In addition, the procedure allows Parties, ECVNAs and MVRNAs to specify changes to their ECVAA notification feedback reporting options for each authorisation (including the ability to opt out of receiving reports).

Upon successful completion of registration, applicants will be able to access the ECVAA Web Service. For further information contact the BSC Service Desk.

¹ It is assumed that the Notification Amendment Type for any Authorisation pre-dating the P309 implementation date is set to 'both' unless it is updated by an Authorisation Change or a successor Authorisation.

The following paragraph will be added at the end of 1.1. after any additions required by other changes i.e. CP1510, which is also proposing adding a paragraph at the end of 1.1 and will be implemented at the same time and in the same version of this document as the P344 IWG1 proposed amendment

MVRNs cannot be submitted in relation to Secondary BM Units.

Amend section 3.6 as follows:

3.6 Termination of MVRNA Authorisations for Other Reasons

Amend section 4.16.3 as follows:

4.16.3 Replacement Notifications

An existing ECVN or MVRN may be replaced by submitting a notification with the same ECVN Identifier or MVRN Identifier as an existing notification, for any valid range of effective dates. This will then be treated by the ECVAAs as an amendment to the original notification, and will be processed as follows:

- Any data contained within a replacement notification for Settlement Periods that have passed the Submission Deadline will be disregarded.
- The notification amendment will overwrite the previously-submitted notification from the Effective From Date of the new notification. The effect of the original notification will therefore be terminated for all Settlement Periods from the Effective From Date of the new notification, including any Settlement Dates and Settlement Periods after the Effective To Date of the new notification.
- A replacement notification in which data for specific Settlement Periods is omitted will result in the Energy Contract Volumes or Metered Volume Reallocations previously notified for those periods being withdrawn.
- A replacement notification with no Energy Contract Volume or Metered Volume Reallocation data for any Settlement Periods will result in the original notification being withdrawn in its entirety from the Effective From Date of the new notification.

While an ECVNAA or MVRNAA remains in force, notifications submitted under that Authorisation can only be replaced by notifications submitted under the same Authorisation. However, once an ECVNAA or MVRNAA has been terminated, notifications previously submitted under it can be replaced by notifications submitted under another Authorisation, provided that it relates to the same Energy Accounts (for an ECVNAA) or Lead Party, Subsidiary Party and ~~BM Unit~~Primary BM Unit (for an MVRNAA).
