

P431 'Post Brexit Agreement Updates'

As a result of the UK leaving the European Union (EU), Great Britain (GB) is no longer part of the Internal Energy Market and updates are required to the BSC to ensure that legal text appropriately reflects these changes.

This Report Phase Consultation for P431 closes:

5pm on Wednesday 5 January 2022

The Panel may not be able to consider late responses.

The BSC Panel initially recommends **approval** of P431

The BSC Panel **does not** believe P431 impacts the European Electricity Balancing Guideline (EBGL) Article 18 terms and conditions held within the BSC

This Modification is not expected to impact BSC Parties

About This Document

Not sure where to start? We suggest reading the following sections:

- Have 5 mins? Read section 1
- Have 15 mins? Read sections 1, 6 and 7
- Have 30 mins? Read all sections
- Have longer? Read all sections and the annexes and attachments

This is the P431 Draft Modification Report, which Elexon is issuing for industry consultation on the BSC Panel's behalf. It contains the Panel's provisional recommendations on P431. The Panel will consider all consultation responses at its meeting on 13 January 2022, when it will agree a make a decision on whether or not the change should be made.

There are four parts to this document:

- This is the main document. It provides details of the solution, impacts, costs, benefits/drawbacks and proposed implementation approach.
- Attachment A contains the draft redlined changes to the BSC for P431.
- Attachment B contains the P431 Proposal Form.
- Attachment C contains the specific questions on which the Panel seeks your views. Please use this form to provide your responses to these questions, and to record any further views/comments you wish the Panel to consider.

P431
Report Phase Consultation

13 December 2021

Version 1.0

Page 2 of 15

© Elexon Limited 2021

What is the issue?

The United Kingdom (UK) left the European Union (EU) on 31 January 2020, but the vast majority of energy-related issues remained unaffected until the end of the Implementation Period on 31 December 2020. As a result of leaving the EU, Great Britain (GB) is no longer part of the Internal Energy Market and updates are required to the BSC to ensure it appropriately reflects these changes.

P431 will not directly impact BSC Parties as these updates are only required to reflect changes that have already taken effect by the UK leaving the EU. None of the changes P431 proposes have an impact on the operation of the BSC – they are, essentially, administrative changes only. Due to the very minor impacts associated with this change, and the prioritisation of other Modifications in the change pipeline, this Modification has been raised at this stage rather than immediately after the UK withdrawal from the EU.

What is the proposed solution?

The Solution seeks to update the BSC in light of the UK leaving the Internal Energy Market. The key amendments in this Modification include:

- Updates to the requirements in [Section F 'Modification Procedures'](#) as to the scenarios in which the Authority and National Grid Electricity System Operator (NETSO) can raise Modification Proposals.
- Removal of reference of Council Directive 77/388/EEC and replacement with part 3 of 'The Value Added Tax (Place of Supply of Goods) Order 2004 as amended by The Value Added Tax (Miscellaneous Amendments and Revocations) (EU Exit) Regulations 2019' in Section N 5.4.3.
- Changing the requirements in relation to the NETSO submitting data to the BMRA so that the data submission is required under the Transparency Regulation only. Direct references to ENTSO-E and EBGL Local Data are also removed.
- Removing Section V6 which relates to the submission of Transparency Regulation data by the BMRA to ENTSO-E.
- Updates and removals of relevant definitions in [Section X-1 'General Glossary'](#).

Impacts and costs

This Modification is not expected to impact BSC Parties as these updates are only required to reflect changes that have already taken effect and as such the Modification has minimal impacts. The implementation costs are only the costs associated with developing the BSC drafting sections. These implementation costs are low at less than £1k.

Implementation

The Panel recommends an Implementation Date of:

- **30 June 2022** as part of the June 2022.

This is the next available Release that this change can practicably be included in.

Recommendation

The BSC Panel initially believe that P431 will better facilitate Applicable BSC Objectives (d) and (e) and should therefore **be approved**. The Panel unanimously do not believe that P431 impacts the EBGL Article 18 balancing terms and conditions. The Panel also believe that P431 should be progressed as a Self-Governance Modification.

2 Why Change?

What is the issue?

The UK left the EU on 31 January 2020, but the vast majority of energy related issues remained unaffected until the end of the transition period at the end of 2020 when the energy related changes as a result of leaving the EU came into force. As a result of the UK leaving the EU, the UK is no longer part of the Internal Energy Market and updates are required to the BSC to ensure that legal text appropriately reflects these changes.

Background

UK exiting the EU

When the UK left the EU on 31 January 2020 the [Withdrawal Act 2018](#) introduced a new legal concept of Retained EU Law. Retained EU Law is essentially a snapshot of EU Law as it applied to the UK as at the end of the Implementation Period (IP) i.e. at 23:00:01 GMT on 31 December 2020. Retained EU Law is regularly referenced in legislation relating to the withdrawal of the UK from the EU and updates are required to the BSC to ensure that historic references relating to EU Directives or Regulations are appropriately updated to reference Retained EU Law which forms part of UK Law.

Proposed solution

The Solution seeks to update the BSC in light of the UK leaving the Internal Energy Market. A summary of all of the changes required are given in the table below:

Solution Summary	
Section	Change
F 2.1.1 g), F 2.1.10A	To clarify that the Authority and NETSO (Sections F 2.1.1 g) and F 2.1.10A respectively) cannot raise Modifications to the BSC in relation to legally binding decisions of the European Commission where that decision does not impact Retained EU Law for standard modifications
F8.2	To clarify that the Authority cannot raise Authority Directed Modifications Proposals to the BSC in relation to legally binding decisions of the European Commission where that decision does not impact Retained EU Law
N 5.4.3	Removal of reference of Council Directive 77/388/EEC and replacement with part 3 of 'The Value Added Tax (Place of Supply of Goods) Order 2004 as amended by The Value Added Tax (Miscellaneous Amendments and Revocations) (EU Exit) Regulations 2019'
N 10.1.1	Changing 'European legislation' to 'legislation' in relation to the despatch of Confirmation Notices
Q 6.1B.1	In relation to the NETSO submitting data to the BMRA changing the requirements to that the data submission is that required under the Transparency Regulation and removing direct references to the NETSO, ENTSO-E and EBGL Local Data
Q.1B.2	In relation to Q 6.1B.1 removing the requirements relating to the Guideline on Electricity Balancing and any procedures specified by ENTSO-E.
V 6	Removal of Section 6 which relates to the Submission of Transparency Regulation Data by the BMRA
X-1	Removal of ENTSO-E Definition Amendments to the Electricity Regulation definition Amendments to the Regulation on Wholesale Energy Market Integrity and Transparency or REMIT definition Amendments to the Transparency Regulation Data definition Amendments to the Transparency Regulation definition New Definition of Retained EU Law New Definition of Withdrawal Act

Benefits

The updates will remove any inaccuracies in the BSC that have arisen since leaving the EU. This will align the BSC with the Retained EU Law, removing any associated ambiguity that currently exists in the BSC.

Applicable BSC Objectives – Proposer views

There is potential for confusion if the BSC contains defunct references to EU Legislation and bodies. This in turn could lead to reduced efficiency in implementing Balancing and Settlement arrangements. P431 will therefore better facilitate efficiency in the implementation of the BSC under Objective (d).

As this Modification makes updates to the BSC that relate to the Energy Regulation (e.g. references to Retained EU Law) the Proposer believes that this Modification better facilitates Applicable BSC Objective (e) 'Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency [for the Co-operation of Energy Regulators]

Legal Text

The proposed redlined changes to the BSC to deliver P431 can be found in Attachment A.

Report Phase Consultation Question

Do you agree with the Panel that the redlined changes to the BSC deliver the intention of P431?

The Panel invites you to give your views using the response form in Attachment C

What are the Applicable BSC Objectives?

(a) The efficient discharge by the Transmission Company of the obligations imposed upon it by the Transmission Licence

(b) The efficient, economic and co-ordinated operation of the National Electricity Transmission System

(c) Promoting effective competition in the generation and supply of electricity and (so far as consistent therewith) promoting such competition in the sale and purchase of electricity

(d) Promoting efficiency in the implementation of the balancing and settlement arrangements

(e) Compliance with the Electricity Regulation and any relevant legally binding decision of the European Commission and/or the Agency [for the Co-operation of Energy Regulators]

(f) Implementing and administering the arrangements for the operation of contracts for difference and arrangements that facilitate the operation of a capacity market pursuant to EMR legislation

(g) Compliance with the Transmission Losses Principle

4 Impacts & Costs

Estimated implementation costs of P431

The costs to implement this Modification will be **low (<£1k)**. These costs are associated with the development of the legal drafting in Sections F, N, Q, V and X-1. No other costs have been identified.

Implementation cost estimates			
Organisation	Item	Implementation (£k)	Comment
Elxon	Systems	0	
	Documents	<1k	The implementation costs are associated with the development of the legal text in Sections F, N, Q, V and X-1.
	Other	0	
NGESO	Systems	0	
	Other	0	
Industry	Systems & processes	0	
Total		<1k	

Estimated on-going costs of P431

On-going cost estimates		
Organisation	Implementation (£k)	Comment
Elxon	0	No impact identified
NGESO	0	No impact identified
Industry	0	No impact identified
Total	0	

No on-going costs are expected as a result of this Modification.

P431 impacts

Impact on BSC Parties and Party Agents		
Party/Party Agent	Potential Impact	Potential cost
N/A	No impact identified	None

Impact on the NETSO	
Potential Impact	Potential cost
No impact identified	None

Impact on BSCCo		
Area of Elexon	Potential Impact	Potential cost
N/A	No impact identified	None

Impact on BSC Settlement Risks
No impact identified

Impact on BSC Systems and processes	
BSC System/Process	Potential Impact
N/A	No impact identified

Impact on BSC Agent/service provider contractual arrangements	
BSC Agent/service provider contract	Potential Impact
N/A	No impact identified

Impact on Code	
Code Section	Potential Impact
BSC Section F	To be amended as per Attachment A to meet the solution requirements detailed in Section 3.
BSC Section N	
BSC Section Q	
BSC Section V	
BSC Section X-1	

Impact on EBGL Article 18 terms and conditions
There are no EBGL impacts as a result of this Modification. The draft legal text does not make any change to any BSC Sections that constitute EBGL Article 18 Terms and Conditions as detailed in the Annex F-2 of the BSC, nor does it extend them.

Impact on Code Subsidiary Documents	
CSD	Potential Impact
N/A	No impacts identified

Impact on other Configurable Items	
Configurable Item	Potential Impact
N/A	No impacts identified

Impact on Core Industry Documents and other documents	
Document	Potential Impact
Ancillary Services Agreements	No impacts identified
Connection and Use of System Code	
Data Transfer Services Agreement	
Distribution Code	
Grid Code	
Retail Energy Code	
Supplemental Agreements	
System Operator-Transmission Owner Code	
Transmission Licence	
Use of Interconnector Agreement	

What are the consumer benefit areas?

- 1)** Will this change mean that the energy system can operate more safely and reliably now and in the future in a way that benefits end consumers?
- 2)** Will this change lower consumers' bills by controlling, reducing, and optimising spend, for example on balancing and operating the system?
- 3)** Will this proposal support:
 - i) new providers and technologies?
 - ii) a move to hydrogen or lower greenhouse gases?
 - iii) the journey toward statutory net-zero targets?
 - iv) decarbonisation?
- 4)** Will this change improve the quality of service for some or all end consumers. Improved service quality ultimately benefits the end consumer due to interactions in the value chains across the industry being more seamless, efficient and effective.
- 5)** Are there any other identified changes to society, such as jobs or the economy.

Impact on a Significant Code Review (SCR) or other significant industry change projects
No impacts identified. We requested that Ofgem treat this Modification as SCR exempt on 2 December 2021 and received confirmation from Ofgem that this Modification was SCR exempt on 9 December 2021.

Impact of the Modification on the environment and consumer benefit areas:	
Consumer benefit area	Identified impact
1) Improved safety and reliability	Neutral
2) Lower bills than would otherwise be the case	Neutral
3) Reduced environmental damage	Neutral
4) Improved quality of service	Neutral
5) Benefits for society as a whole	Neutral

Other Impacts	
Item impacted	Potential Impact
N/A	No other impacts identified

Report Phase Consultation Questions

Will P431 impact your organisation?

How much will it cost your organisation to implement and operate P431?

The Panel invites you to give your views using the response form in Attachment C

5 Implementation

Recommended Implementation Date

The Panel recommends an Implementation Date for P431 of:

- **30 June 2022** as part of the standard June 2022 Release.

This is the next available Release that this change can practicably be included in.

Report Phase Consultation Question

Do you agree with the Panel's recommended Implementation Date?

The Panel invites you to give your views using the response form in Attachment C

6 Panel's Initial Discussions

The P431 Initial Written Assessment Report was presented to the Panel at its meeting on 9 December 2021 ([321/04](#)).

The Panel agreed unanimously that P431 would better facilitate Applicable BSC Objective (d) on the basis that the clarifications contained in this Modification would make it easier and quicker for market participants to understand their obligations under the BSC.

The majority of Panel members (8 for, 1 against) agreed that P431 would also better facilitate Applicable BSC Objective (e). These Panel Members agreed with the rationale given by the Proposer (as detailed in Section 3 of this report). Elexon clarified that Applicable BSC Objective (e) is still valid after the UK has left the EU on the basis that:

- The definition of 'Electricity Regulation' (contained within Applicable BSC Objective (e)) has been amended in Standard Condition A1 to ensure that references in the licence are to the Electricity Regulation as it forms part of retained UK law and is therefore still applicable.
- There are relevant legally binding decisions of the European Commission and/or the Agency that apply after the end of the Implementation Period and these are those that form part of retained EU law.

The Panel Member that did not believe that P431 better facilitated Applicable BSC Objective (e) noted the above but highlighted requirements within the BSC that require BSC Parties to comply with UK Law anyway making Applicable BSC Objective (e) redundant. They believed P431 was neutral against Objective (e).

The Panel therefore believed P431 should be approved as it better facilitates Objectives (d) and (e).

A Panel Member queried whether the removal of the references to EBGL Local Data in Section Q proposed under this Modification could lead to some data not being published that otherwise would be. Elexon advised that nothing has changed in respect of EBGL Local Data and the only thing that has changed is that data is no longer going to ACER or ENTSO-E.

The Panel agreed to send P431 directly to the Report Phase as a Self-Governance Modification. The Panel believed that this would be the most appropriate route to follow as the solution is self-evident, does not materially impact the Self-Governance Criteria and the Modification does not directly impact BSC Parties as these updates are only required to reflect changes that have already taken effect by the UK leaving the EU. The changes are non-material and do not amend the requirements of the BSC.

Report Phase Consultation Questions

Do you agree with the Panel's initial unanimous recommendation that P431 should be approved?

Do you agree with the Panel's initial view that P431 should be treated as a Self-Governance Modification?

Do you agree with the Panel's initial consideration that P431 does not impact the European Electricity Balancing Guideline (EBGL) Article 18 terms and conditions held within the BSC?

[The Panel invites you to give your views using the response form in Attachment C](#)

7 Recommendations

The BSC Panel initially recommends:

- That P431:
 - **DOES** better facilitate Applicable BSC Objective (d); and
 - **DOES** better facilitate Applicable BSC Objective (e).
- That P431 should be **approved**;
- That P431 **does not** impact the EBGL Article 18 terms and conditions held within the BSC;
- That P431 is a Self-Governance Modification Proposal;
- An Implementation Date for P431 of:
 - **30 June 2022** as part of the standard June 2022 Release; and
- The draft BSC legal text for P431.

Appendix 1: Glossary & References

Acronyms

Acronyms used in this document are listed in the table below.

Acronym	
Acronym	Definition
BMRA	Balancing Mechanism Reporting Agent
BSC	Balancing and Settlement Code
CSD	Code Subsidiary Document
EBGL	Electricity Balancing Guideline
ENTSO-E	European Network of Transmission System Operators for Electricity
EU	European Union
GB	Great Britain
GMT	Greenwich Mean Time
IP	Implementation Period
IWA	Initial Written Assessment
NETSO	National Electricity Transmission System Operator
REMIT	Regulation on Wholesale Energy Market Integrity and Transparency
SCR	Significant Code Review
